PRESENTATION

Research laboratories of the burgundy campus have various skills at the service of public policies, in particular on:

- Territorialized public policies and territorial organization: notion of cohesion and convergence of European policies, impact on optimal territory organization;
- Expertise developed on agricultural policies and on evaluation of agri-environmental measurements at the CESAER;
- Analysis of public policies and their impact on territorial organization of activities and actors.

They conduct researches on:

- Policies to conduct on issues on localization, spatial inequalities, agglomeration, dispersion, communication...
- Issues of identifying approval modes and knowledge diffusion for a suitable territorial governance;
- Concepts and challenges of territorial intelligence.
