

# MEDTECH PATIENTS PRIORITY SOFT

## OPTIMUM

WEB-BASED TOOL FOR PATIENT PRIORITISATION IN A&E

Technology matured by

# EMERGENCY

# E HEALTH

# PATIENTS PRIORITIZATION

The Optimum solution is a Web Service that:

- **Applies sorting rules**, specific to the considered service, to the data received from the business software (ResUrgences, Sillage, or others...) without re-entering the data
- **will calculate a real-time stress indicator**, based on 3 years of historical data of the considered service,
- will allow the **delay in patient care** to be visualized on a synoptic screen independent of the business software.

**Alliance Opportunity : Licensing**

**IP : Software**

**TRL : 6**
