

MEDTECH INFUSION

POMPE

Technology matured by

PUMPE is a sensor that enables precise and real-time measurement of a patient's infusion rate.

#Infusion

#Safety

#MedicalDevice

This device offers the following advantages :

- Precise flow rate measurement
- Leak detection
- Easy to install
- Low cost
- Available in 2 versions (infusion pump or syringe pump)
- Compatible with all types of infusion pumps or syringe pumps
- Developed for general anesthesia
- Designed in collaboration with clinicians

Other Potential Applications: Enteral /Parenteral nutrition, filling ...
