

GREENTECH BIOCONTROL

HYVEBIO

Technology matured by

Insecticide based on a natural protein.

#Bioinsecticide

Proteins

#Biocontrol

HYVEBIO technology is a new innovative bio-insecticide derived from a natural protein that controls aphids and moths on fruit and cereal crops while remaining harmless to non-pest insects.

Production of the protein in a heterologous system allows this insecticide to be classified as a bio-insecticide.

Partnership : Licencing, co-development

IP : Patent
