

BIOTECH Therapy

CANDITARGET

Technology matured by

#*Candida auris*

#*Aspergillus fumigatus*

#New target

Achievements :

- New class of antifungal molecules (CMI < 1µg/mL)
- Activity against *Candida albicans* and *Candida auris*
 - Ability to destroy the formed biofilm
- Activity against *Aspergillus fumigatus*
- New target
- Development of *in vivo*-like model *Galleria mellonella*
 - No *in vitro* toxicity

New molecules for the treatment of invasive candidiasis

Impact of CANDITARGET molecules
on the biofilm formed
of *C. albicans*, after 24h

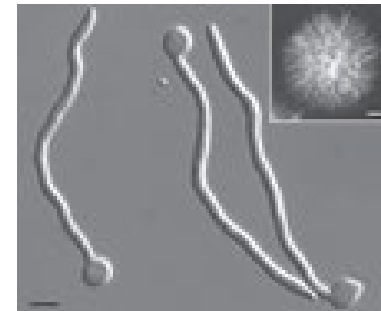

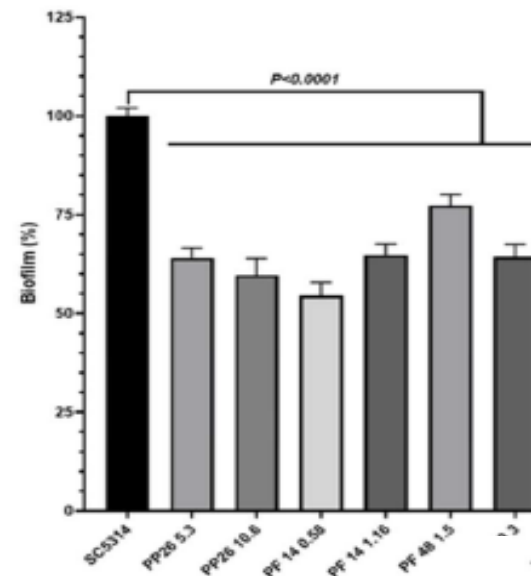

Photo *C. albicans*
