

# GREENTECH POLYMERS

## ITALUMAT

Technology matured by

ITALUMAT is a new bio-sourced elastomer thermoplastic material.

#Thermoplastic

#Bio-sourced

#Elastomer

ITALUMAT technology is produced from biomass. This material can be reshaped without altering its mechanical properties and can also deform and then return to its original shape.

The target application markets are automotive bumpers and seals, and sports accessories.

**Partnership :** Licencing, co-development

**IP :** Secret
